Natural Language Processing Concepts

What is natural language processing?

Natural language processing and conversational AI in Azure

 Language	 Speech	 Translator
<ul style="list-style-type: none">• Language detection• Key phrase extraction• Named entity detection• Sentiment analysis and opinion mining• Personal information detection• Summarization• Question answering• Conversational language understanding• ...	<ul style="list-style-type: none">• Text to speech• Speech to text• Speech translation• Speaker identification• Language identification• ...	<ul style="list-style-type: none">• Text translation• Document translation• Custom translation• ...

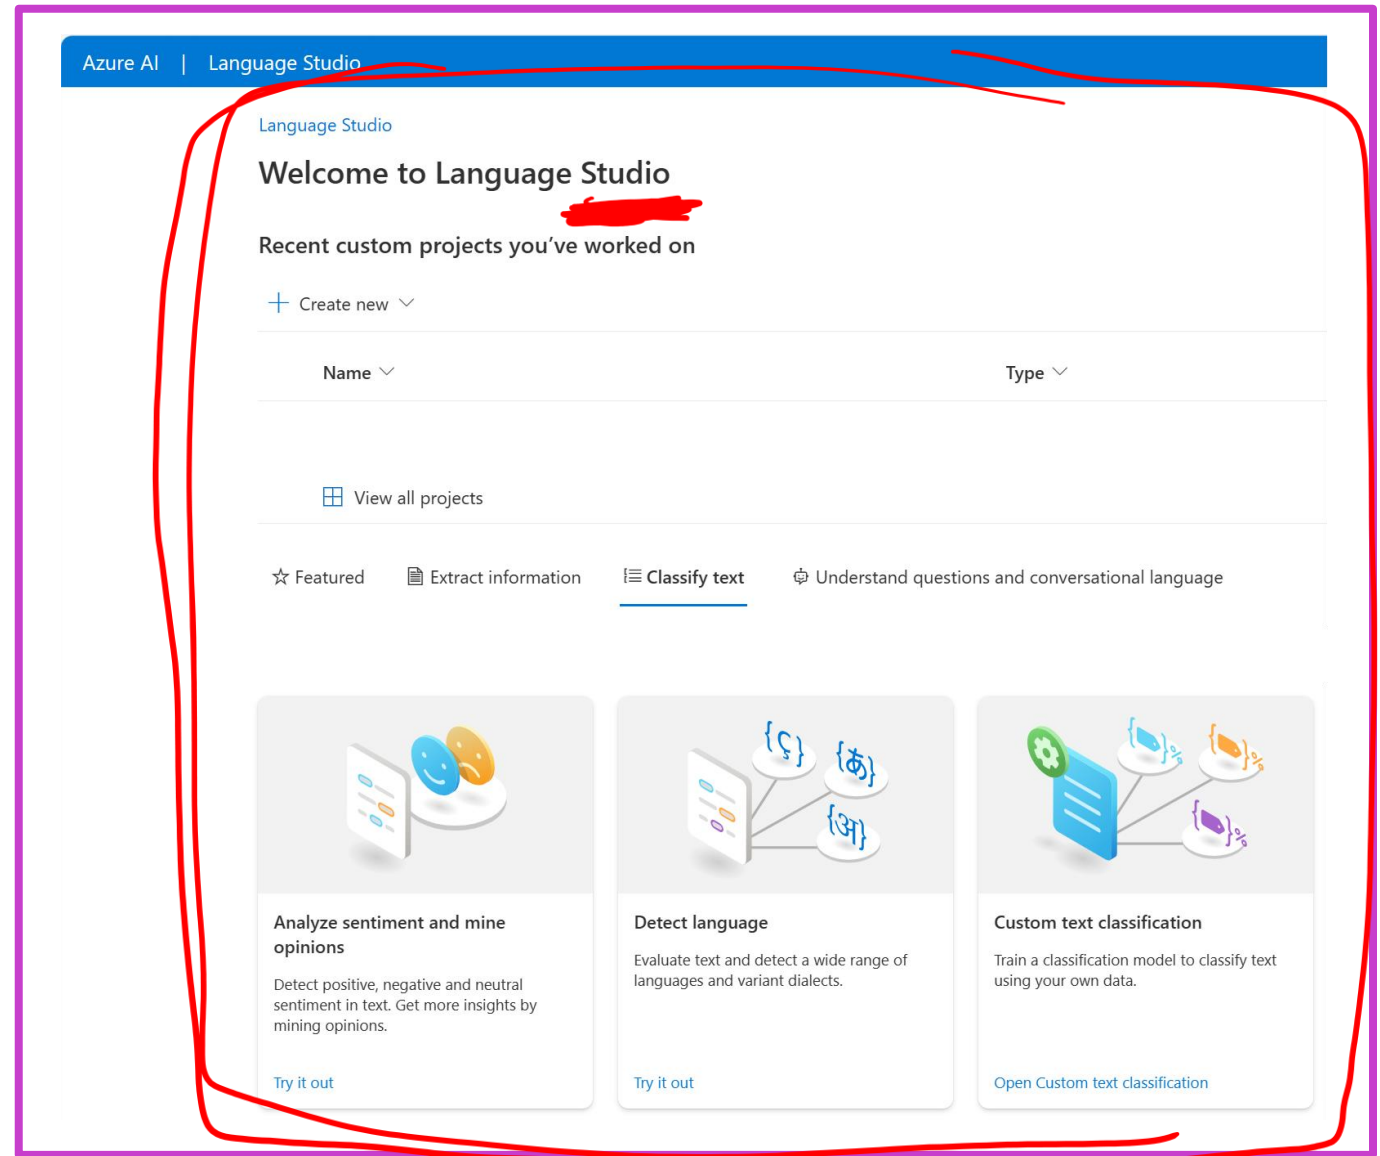

Natural Language Processing capabilities in Azure

Analyzing text

I had a wonderful vacation in France.

- **Predominant Language:** English
- **Sentiment:** .88 (positive)
- **Key Phrases:** "wonderful vacation"
- **Entities:** France

Question answering

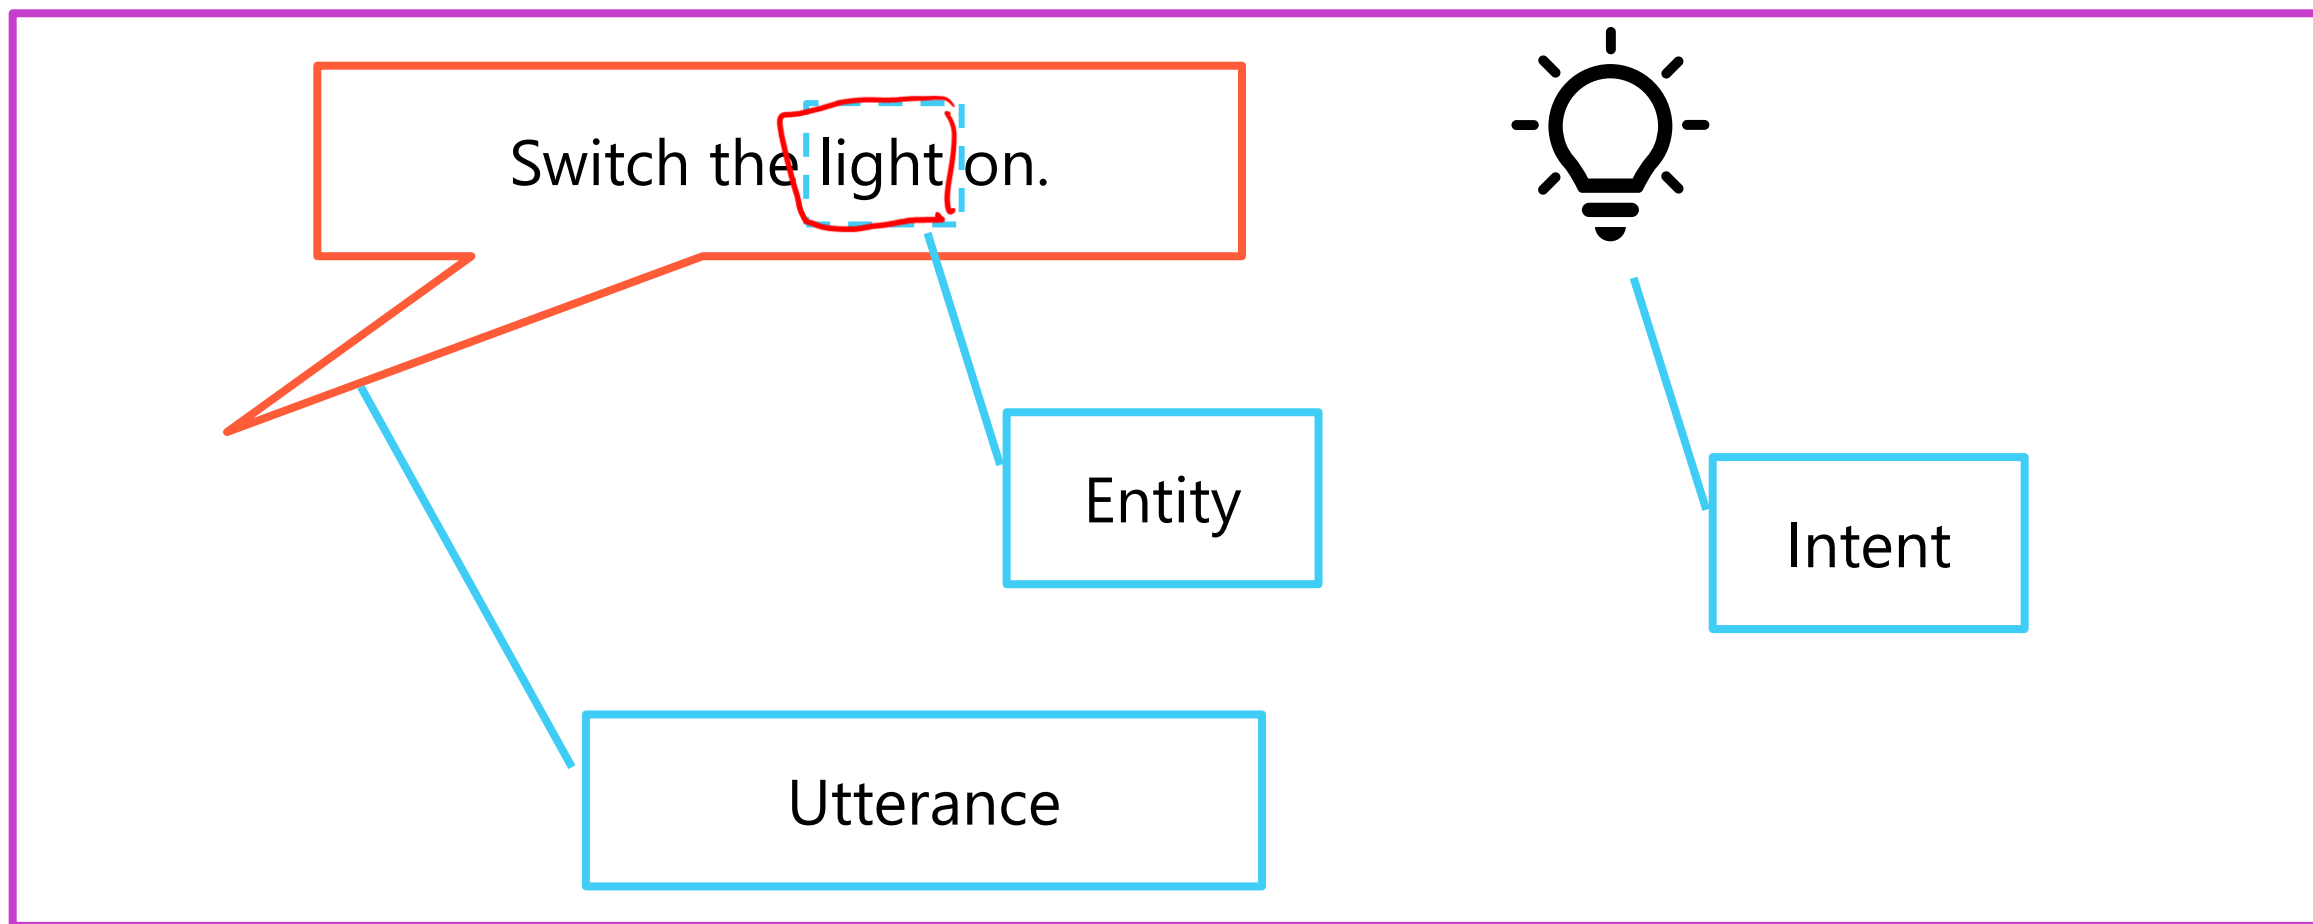

Define a *knowledge* base of question and answer pairs:

- By entering questions and answers
- From an existing FAQ document
- By using built-in *chit-chat*

Consume the knowledge base from client apps, including bots.

Conversational language understanding

Speech recognition and synthesis

Use the *speech-to-text* capabilities of the **Speech** service to transcribe audible speech to text

Use the *text-to-speech* capabilities of the **Speech** service to generate audible speech from text

Translation

Use the *text translation* capabilities of **Azure AI Translator** service to translate text from one language to others.

English → French

Have a good day → Bonne journée

Use the *speech translation* capabilities of **Azure AI Speech** service to generate translated speech.

Input audio (English) → Output audio (French)

Exercise: Analyze text with Language Studio

In this exercise, you will use the **Azure AI Language** service to analyze text.

1. Use the hosted environment and Azure credentials provided for this exercise.
2. The instructions are also available on Learn: <https://aka.ms/ai900-text-analysis>

Knowledge check

- 1** What are some capabilities included in the Azure AI Language service?
 - ☐ Translation and bot deployment
 - ☐ Speech recognition
 - ☐ Text analysis, custom question answering, conversational language understanding

- 2** You want to use the Azure AI Language service to determine the key talking points in a text document. Which feature of the service should you use?
 - ☐ Sentiment analysis
 - ☐ Key phrase extraction
 - ☐ Entity detection

- 3** You want to create a knowledge base for bots. What service would you use?
 - ☐ Conversational Language Understanding with the Azure AI Language service
 - ☐ Question Answering with the Azure AI Language service
 - ☐ Azure AI Document Intelligence

Knowledge check

- 1** What are some capabilities included in the Azure AI Language service?
 - ☐ Translation and bot deployment ✗
 - ☐ Speech recognition
 - ☒ Text analysis, custom question answering, conversational language understanding

- 2** You want to use the Azure AI Language service to determine the key talking points in a text document. Which feature of the service should you use?
 - ☐ Sentiment analysis ✗
 - ☒ Key phrase extraction ✓
 - ☐ Entity detection ✗

- 3** You want to create a knowledge base for bots. What service would you use? ✗
 - ☐ Conversational Language Understanding with the Azure AI Language service ✗
 - ☒ Question Answering with the Azure AI Language service ✓
 - ☐ Azure AI Document Intelligence ✗
